## Press release

FOR IMMEDIATE RELEASE

# InnoStrat expands its Board of Directors, strengthening its global value proposition for new and existing customers

Anticipating continued strong international business growth, the Danish consultancy welcomes new board members

**Copenhagen, Denmark – 11 March 2025**

**InnoStrat** is a fast-growing life sciences consultancy based in Denmark, Switzerland and UK. The company, founded by **Jan Kildeskov** and **Mikkel Nielsen**, has achieved a solid and consistent profitable growth by leveraging its extensive big pharma experience in clinical, medical, and commercial strategy and execution.

“We have built a strong and loyal customer base in Europe and are now ready to further grow our strategic consultancy offering internationally,” says Jan. “The new board-of-directors members have been chosen for the complementary professional experience and skills that they will bring to InnoStrat’s exciting growth journey and to our customers.”

Welcoming 3 new board members:

- **Christian Kanstrup** is CEO of **Evaxion Biotech** and former Senior Vice President of Strategy, Marketing, Market Access and Medical Affairs at **Novo Nordisk**. Christian brings extensive international leadership experience in biopharmaceutical innovation and corporate strategy.
- **Jakob Wedel**, SVP of Corporate Development and M&A at **illumina** and former Partner at **Bain & Co.** adds highly specialized experience in strategy and corporate development as well as scaling consultancy businesses.
- **Malte Clausen**, former Partner at **Boston Consulting Group (BCG)**, offers decades of experience as a senior executive consultant in strategy and operations across health care, industrial biotech and the energy sector.

“We are confident that Christian, Jakob, and Malte will round out our core competencies as pharma insiders to establish InnoStrat as a premier global partner for biotech and pharmaceutical companies. Our combined experience and business acumen will support clients to accelerate their clinical, medical, and commercial transformation through strategic integration of technology and AI to gain a critical edge in a competitive and fast-paced industry,” adds Mikkel.
